An element of each group shall submit the task report that the group held in Moodle until <u>November 26, at 11h55 pm</u>. <u>No further submissions are accepted.</u> The submission file name must have the form

<class>_<student-number-1>_<student-number-2>_<student-number-*N*>.pdf

For example, the group with students <u>9999997</u>, <u>9999998</u> and <u>9999999</u> in the <u>3DZ</u> class should submit a file named 3DZ_9999997_9999998_9999999.pdf in Moodle. <u>Each student must carry out two user stories, and it must be clearly indicated in the report who carried out each one. Each user story cannot be solved by more than one student in the group</u>.

User stories

1. As the system administrator I want the deployment of one of the RFP modules on a DEI VM to be systematic, validating in a scheduled manner with the test plan.

2. As the system administrator I want only clients on the DEI's internal network (cabled or via VPN) to be able to access the solution.

3. As the system administrator I want the clients listed in user story 2 to be defined by simply changing a text file.

4. As a manager I want to identify and quantify the risks involved in the proposed solution.

5. As the system administrator I want the MBCO (*Minimum Business Continuity Objective*) to be defined and proposed to the *stakeholders*.

6. As an administrator I want a backup strategy to be proposed and implemented that minimizes RPO (*Recovery Point Objective*) and WRT (*Work Recovery Time*).

7. As system administrator I want to define a public folder for all users registered on the system.

8. As system administrator I want to get the users with more than 3 incorrect logins.
